Praj contributes to PM cares Fund

Pune, April 09 2020

The outbreak of the Covid 19 pandemic has put public health and economy at risk like never before. Landmark initiative by Government such as nation-wide lockdown is helping suppress the spread of the virus.

Praj recognizes the extraordinary courage and efforts of all those who put themselves in harm's way to combat the pandemic. This includes medical and health care professionals, sanitation workers, the police force and personnel in essential services such as utilities, food and agriculture, telecommunications, etc.

As a corporate citizen, Praj understands the need of the hour to show its solidarity to the major initiative undertaken by the government by way of setting up PM CARES Fund to help combat Covid 19. The company is honoured to respond positively to PM's appeal by contributing Rs. 1.01 cr. to the fund.

"While the COVID-19 pandemic continues to take a heavy toll on families, communities and nations across the world, it is heartening to see private contributors, organizations and associations respond positively to strengthen the PM's hands," noted Pramod Chaudhari, Executive Chairman, Praj Industries. "We're all in this together and can only succeed if we do our best jointly. We consider it our responsibility to serve society to help overcome the crisis. We are confident that with collective efforts we shall surmount this challenge under the PM's leadership and return to normalcy sooner than later," added Mr. Chaudhari further.

Praj recently provided free and open access on its website to its sanitizer technology, (<https://www.praj.net/praj-sanitizer-technology/>). The technology know-how and design engineering package is available for production in standard plant capacity of 2KLPD (20,000 bottles of 100 ml each) and 5KLPD (50,000 bottles of 100 ml each). This is in line with recommendations by WHO and Ministry of Health, GOI to use hand sanitizers to curb the spread of Covid19. The company is experiencing huge market traction for its sanitizer technology and is responding positively.

Praj Industries Limited:

Praj, India's most accomplished engineering company in the field of industrial bio technology, is driven by innovation and integration capabilities. The company is a torch bearer of Bio-mobility, offering technology solutions globally to produce renewable transportation fuel. Praj's diverse portfolio comprises Bio-energy plants, Renewable natural gas facilities, Critical process equipment & skids, Breweries, Zero liquid discharge plants and High purity water systems.
